

Artwork Guidelines- Indoor & Outdoor Posters

Outdoor Posters- 12 Sheet

All artwork needs to be set up at the correct scaling to the final artwork. Bleed outside the print area is not required.

Poster should be set up at 3048mm x 1524mm or scaled to

- 304.8mm x 152.4mm (Tenth Scale)
- 762mm x 381mm (Quarter Scale)
- 1524mm x 762mm (Half Scale)
- 3048mm x 1524mm (Full Scale)

12 sheets require 2 inches on the bottom and 4 inches on the far right hand side which contains no text or important images, this is indicated on the diagram in grey. Once you have supplied us the artwork it will be printed with panel splits measuring 1016mm x 1524mm at full size making 3 panels in total. We take care of this.

When looking at print resolution, if your file is at tenth scale and viewed at 1000% this will give you the exact view of how it will print. i.e. the actual correct size when magnified. Please note this only applies to image based files where images are 'live', such as Illustrator, Photoshop and high-res PDFs as the image is 'embedded' in the file. With layout files such as Quark and InDesign it is advisable to save as high-res PDFs, then view the PDF at the correct magnification. This rule also applies to quarter scale being 400%, half size being 200% and full size being 100%.

With all artwork please ensure the following:

All elements are CMYK and not RGB. (Images, logos, etc.)

Black should be submitted as C 0%, M 0%, Y 0%, K 100%

All artwork has fonts/text included (embedded/uploaded) or are outlined in the files.

Images are 300dpi or an acceptable quality for the order.

If sending raw elements please include all files used in the creation of the artwork.

Please ensure PC files are supplied as print ready high-res PDFs with fonts/text outlined.
